

Home Improvement Project - Kanban Board

Peer-graded assignment submission. This board organizes the workflow for a small home improvement project focused on planning, purchasing, painting, lighting, and final inspection.

Project goal Refresh the living room and entry area by repainting walls, updating light fixtures, and improving storage/organization.	Definition of done Room is painted, fixtures installed, furniture returned, waste removed, and final quality checklist approved.	Team / owner Homeowner (project lead), electrician (as needed), paint store, delivery service.
---	--	--

Backlog / To Do	In Progress	Review / Testing	Done

Declutter room and pack fragile items Prep Protect decor, electronics, and breakables.			

Workflow notes: Work moves from left to right. New tasks enter the backlog, active work is limited in the In Progress column, completed work is verified in Review / Testing, and only accepted tasks move to Done.

User stories / outcomes: As a homeowner, I want the room repainted and lighting improved so the space looks brighter, cleaner, and more functional without exceeding budget or creating safety risks.
